

WIPO DAS User Guide Summary Table

This summary table contains information provided by the ID5 partners. The document is for educational and informational purposes only. It aims to reflect the practices of the participating offices in the area of industrial designs. The ID5 partners are not responsible for any use that may be made of the information contained in the user guide or summary table. Readers looking for reference or additional material related to applications or practice before an ID5 partner are encouraged to consult the website of the respective ID5 partner.

	CNIPA	EUIPO	JPO	KIPO	USPTO
I. AS A DEPOSITING OFFICE					
I.1 – What are your Office’s requirements for authorization to permit access by applicant (e.g., form of authorization, who can sign, how to submit, etc.)?	The person uses the DAS service shall be one of the applicants or the agency serving for the applicants.	WIPO DAS is only available for Community Design applications (not EU trade marks). The applicant can request that its Community Design application be included in WIPO DAS by checking a box in the e-filing form.	The JPO does not authorize applicants to choose specifically which information to be or not to be deposited.	There is no requirement for express authorization, e.g., via a form.	The Application Data Sheet (ADS) form (PTO/AIA/14) includes a section allowing applicants to provide the USPTO with authorization to permit a participating office access to a U.S. priority application. If authorization to permit access is not provided in an ADS with the initial filing of the application, applicants should use form PTO/SB/39 ("Authorization or Rescission of Authorization to Permit Access to Application-As-Filed by Participating Offices") to provide authorization to permit access.
I.2 – Does your Office provide notification of DAS access code to applicant: how, when, and where?	When WIPO informs CNIPA the DAS deposit is successfully done, CNIPA will automatically inform the applicants via email.	Yes. By default, the applicant will automatically receive the access code, which they can then cite when claiming priority from the application in	Where an applicant files an application for design registration online, the JPO provides the applicant with online filing receipt on which an access	If an application is submitted on or after July 1 st , 2020, KIPO provides a DAS access code to the applicant accompanying the application number. If	The DAS access code is the 4-digit confirmation number indicated on the filing receipt and electronic acknowledgement

	CNIPA	EUIPO	JPO	KIPO	USPTO
		<p>subsequent filings before other offices party to the WIPO DAS system. The applicant has the option to opt-out if desired (see answer 1.7).</p> <p>The access code is generated at the end of the RCD Efiling process and inserted in the Efiling Receipt.</p>	<p>code is specified. For filing made in paper form, the access code will be included in the notification of application number sent by postcard from the JPO. In addition, where filing is made through the collective application for multiple designs procedure, an access code for the collective application for multiple designs procedure as well as individual access codes for an application for each of the designs will be provided.</p>	<p>an application was submitted before July 1st, 2020, KIPO provides a DAS access code only when the applicant requests.</p>	<p>receipt of the U.S. application.</p>
<p>I.3 – Which application number format(s) do you provide? Do the application number format(s) include the combination of (i) type of intellectual property (e.g., industrial design application), (ii) priority application number, and (iii) priority application date?</p>	<p>The 13-digit application number is used, of which the first four digits is the year, the fifth digit is the patent type, followed by the serial number and check code.</p>	<p>Community Design applications hosted in EUIPO’s digital library use the number format <i>NNNNNNNNN-NNNN</i>. The first nine digits are the serial number assigned based on the order of filing; the last four digits correspond to the number of the design within a multiple application.</p>	<p>The application number format: “YYYYNNNNNN D” (YYYY as Western Calendar Year; NNNNNN as Serial Number; “space”; and letter “D”)</p> <p>E.g., 2020012345 D</p> <p>Please note “space” and letter “D” are also required for design application</p>	<p>KIPO provides a format conforming to PP-YYYY-NNNNNNN. The leading two digits (PP) indicate the type of IP rights and the following four digits (YYYY) indicate the designated year and the last seven digits (NNNNNNN) are the serial number. (Please refer to WIPO Handbook Part 7.2.6 for further information.) Our application number has</p>	<p>The USPTO provides an application number format conforming to NN/NNN,NNN. The leading two digits before the slash are the series code. The trailing six digits are the serial number, which is sequentially assigned based on the order of filing. The US designates the type of intellectual property via the series code and</p>

	CNIPA	EUIPO	JPO	KIPO	USPTO
				nothing to do with the priority application number nor the priority application date.	assigns unique priority application numbers based on the combination of series code and serial number.
I.4 – Must the application format provided by your office be strictly followed for successful retrieval? For example, if the application number format includes check digits, spaces or other separators (e.g., “-” or “.”), must those elements be present for retrieval?	Yes, the format must be strictly followed.	Yes, the application format must be strictly followed.	Yes. For design application, “space” and letter “D” must be included in the access code. Due to insufficient entry of these elements of the code, there have been many failed cases of Electronic Priority Document Exchange.	KIPO recommends using separators (hyphens). (e.g. 10-2011-0004599) However, we can accept the application number without separators or with other separators such as spaces. (e.g. 1020110004599, 10 2011 0004599)	The application number is the following format: NNNNNNNN. If there are special characters, such as NN/NNN,NNN, there is a validation process that checks for and removes the special characters.
I.5 – What are the common causes of failed transmissions of documents to Accessing Offices (e.g., access code typographical errors, mismatched filing dates, erroneous number formats, etc.)?	Access code typographical errors, mismatched filing dates or application number	We believe these errors are checked at WIPO level and do not reach us. From our side, technical errors may arise and we have a “retry” mechanism in place.	Error in the priority date and the access code etc. Error in the number format For design application, “space” and letter “D” must be included in the access code. Due to insufficient entry of these elements of the code, there have been many failed cases of Electronic Priority Document Exchange.	The most frequently occurred failure is “File is not available.” KIPO issues the message “File is not available” when the requested priority document is based on the application that is under the formality check procedure or the digitalization procedure. Regarding your examples, WIPO DAS usually checks those errors first and issues	Common causes of failed transmissions of documents include: typographical errors in the application number, filing date, and/or country code; typographical errors in the WIPO DAS access code; and applicant’s failure to authorize access.

	CNIPA	EUIPO	JPO	KIPO	USPTO
			<p>Insufficient number of digits can also cause failed transmissions.</p> <p>E.g., Correct entry: 2023012345 D</p> <p>Incorrect entry 1: 2023012345</p> <p>Incorrect entry 2: 202312345 D</p>	error codes to the accessing office.	
I.6 – Does your office upload a specific type of document for retrieval depending on the status of the application (e.g. the application form, or the registration certificate, or both)?	No	As of 9 December 2022, EUIPO uploads both the application form and the registration certificate. Until that date the EUIPO uploaded either the application form or the registration certificate depending on the status of the design at the time of retrieving the priority documents.	Generally, application forms are deposited. When priority document exchange is requested, if formality check of the submitted documents such as written amendments or notification of change of applicant name, etc. has been completed, information of such intermediate documents will also be included in the priority certificate.	KIPO produces a certified copy of an application with the specification and the drawings that were initially filed, regardless of the status of the application.	The USPTO deposits, via the WIPO DAS, certified copies of as-filed U.S. national patent applications, including U.S. design applications.
I.7 – Does your office implement the DAS opt-in or opt-out and why? If the answer changes based on application status or triggering events (e.g., a design application that that is not publicly	CNIPA uses opt-out	Yes. The EUIPO allows applicants to opt-out of WIPO DAS at the moment of filing. Applicants simply de-select the WIPO DAS check box. There is no mechanism in place to	The JPO implements opt-in, but not opt-out.	KIPO does not implement the DAS opt-in or opt-out, and there is no plan to implement them.	The USPTO implements opt-out prior to publishing the application or otherwise making the application publicly available. The ADS form contains the written authorization

	CNIPA	EUIPO	JPO	KIPO	USPTO
<p>available as compared to one that is publicly available), please include the conditions that affect the implementation of opt-in or opt-out.</p> <p>Opt-in means that any application filed with your office is deposited in WIPO DAS so that certified copies can be requested through the system. Opt-out means that priority document details are registered in WIPO DAS on a demand basis by applicants.</p>		opt in or out of WIPO DAS after filing.			required by 37 CFR 1.14(h)(1). But an Applicant may choose to “opt-out” of the authorization by checking a box in the ADS form.
<p>I.8. – Does your office implement any procedure to correct the contents of cover pages of certified copies due to amendment of filing date?</p>	Yes, CNIPA implement procedures to correct the contents of the cover pages of certified copies.	Certified copies are only provided once a filing date has been accorded.	Certified copies are sent after the application date has been final and binding.	If any changes to bibliographic items (e.g. invention title, applicant, etc.) are approved by KIPO, then such changes are reflected on the cover page of a certified copy automatically. KIPO does not allow to change the filing date.	Certified copies are only provided after a filing date has been accorded. The USPTO will not reissue or send a corrected certified copy with the amended filing date on its own. If the filing date was changed, the cover page on any subsequently issued certified copies would indicate the new filing date.

	CNIPA	EUIPO	JPO	KIPO	USPTO
I.9 – Pursuant to the WIPO DAS framework, the International Bureau publishes details for each office as to the application types and document format requirements. Does your office deposit documents, or deposit documents in a document format (e.g., color, grayscale, PDF, JPEG, etc.), other than what is indicated on the WIPO DAS notifications page? Do the contents of the deposited design application include (i) a copy of originally filed application and (ii) other data and/or documents (please specify the data and/or documents)?	Yes, it includes a copy of originally filed application with certified page (including information about the application date, application number, title of application, applicant name, designer etc.)	No. The EUIPO deposits documents in PDF format. The EUIPO does not deposit documents in a format that is different to what is indicated in the WIPO DAS notifications page. No, the EUIPO does not provide more than the certified copy of the originally filed application and the registration certificate (where available). However, where the original application is a multiple design application, the EUIPO splits the multiple application and deposits the part corresponding to each design. Therefore, only a part of the original application form, corresponding to the related design, is deposited.	Pursuant to the WIPO DAS framework, the JPO deposits PDF image data.	Since WIPO DAS accepts only 2D-PDF format, KIPO supports color 2D PDFs. Regarding the 3D modeling that KIPO accepts for the design application, there is no way to transmit the 3D modeling file itself. Since 2019, KIPO IT division has raised this issue and proposed a new priority document format to WIPO CWS. The USPTO (utility patent) is now the lead office to solve the issues related to the transmission of 3D modeling files, sound files, movie clips, XML formatted sequence listings, etc. via WIPO DAS.	The document format requirements published on the WIPO DAS notifications page for the USPTO are correct. The USPTO will deposit a certified copy of the US design patent application, which includes any drawings and appendices contained in the Supplemental Complex Repository for Examiners that have a document filing date that is on or before the filing date of the U.S. design patent application. The deposited design application will include a copy of the originally filed application and any other document in the application file having a date that is on or before the filing date of the design application.
I.10 – Are there any limitations (e.g., color, file size, etc.) to the documents provided by your Office other than	PDF format is required.	No.	No.	There are no limitations on color, file size, etc.	There are no additional limitations.

	CNIPA	EUIPO	JPO	KIPO	USPTO
<p>what is indicated on the WIPO DAS notifications page? If there is a limitation, what step(s) should an applicant take if the limitation is exceeded? For instance, what step(s) should an applicant take if there are limitations with respect to file size and the file size of the document exceeds that limitation?</p>					
<p>I.11 – Are there any legal prohibitions (e.g., application under secrecy orders) that would prevent the application from being deposited by your Office?</p>	<p>No</p>	<p>No.</p>	<p>No. On the other hand, where an application for design registration is not verifiable as it is for reasons such as no reproductions attached, the JPO will not deposit issuance of priority certificate for such design application.</p>	<p>A patent application classified and treated as confidential is prohibited to file in any foreign country before getting the permission of the Commissioner of KIPO. In this case, we do not issue a certified copy of the patent application.</p>	<p>Applications that fall under a Secrecy Order under 37 CFR 5.2 shall be kept secret and are not published. All information material to the subject matter of the application must be kept in confidence, unless written permission to disclose is first obtained from the Commissioner for Patents except as provided by the Secrecy Order. Thus, such documents would not be deposited by the USPTO. For applications not under any secrecy orders and that have not been</p>

	CNIPA	EUIPO	JPO	KIPO	USPTO
					published or other made publicly available, authorization from the applicant must be in the application file and a foreign filing license must be granted before the application can be deposited with WIPO DAS.
I.12 – If there are no legal prohibitions (e.g., application under secrecy orders) that would prevent the application from being deposited by your Office, when is the application typically deposited with WIPO DAS (e.g., at 4 months from filing)?	<p>Option 1: Applicants could deposit when application is filed.</p> <p>Option 2: Applicants could deposit after application is filed, and in this case, the deposit should be done before the deadline set by the accessing office.</p>	<p>The application is not “deposited”, rather it is sent by EUIPO upon request from the Office of second filing, provided a filing date has been accorded.</p> <p>Community designs are registered on average within 2 days of receipt for fast-track applications, and within 10 days of receipt for standard track applications. The first Office action is sent within 10 days of receipt, and if there is a filing date deficiency the applicant has two months to remedy. Therefore, applications are <i>typically</i> available</p>	<p>The documents will be deposited with WIPO DAS automatically after the design application filed with the JPO.</p>	<p>In 2022, KIPO receives a priority document request from WIPO DAS after an average of 407 days from the earlier filing date.</p>	<p>The application will be registered into WIPO DAS and ready for retrieval shortly before issuance of the filing receipt. Assuming that there are no legal prohibitions, this should occur within about a month from the application’s filing date.</p>

	CNIPA	EUIPO	JPO	KIPO	USPTO
		within 10 days of receipt.			
I.13 – Please provide your Office contact information for receiving inquiries from an Accessing Office, such as retrieval failure and inconsistencies in the content of a successful retrieval.	Accessing office could contact WIPO, and then WIPO would inform CNIPA. Plus, the bilateral contact points could transfer this kind of information to staff in charge of DAS in CNIPA.	euipoid5@euipo.europa.eu	Information Technology Policy Planning Office	KIPO receives inquiries via the “ kpion@korea.kr ” or email of the person in charge. 	CNIPA	EUIPO	JPO	KIPO	USPTO
II. AS AN ACCESSING OFFICE					
II.1 – What are the formal requirements for a request by the applicant, including timing and contents to retrieve a priority document from a Depositing Office via WIPO DAS?	The applicant needs to submit a priority digital access service (DAS) request and correctly fill in the name of the depositing office, the previous application date, the previous application number, access code and other information. The copy of the first patent application document should be submitted within three months.	<p>As Accessing Office, the EUIPO accepts priority claims by way of reference in the fields provided for that purpose, namely, the file number, filing date and country of the previous application together with the WIPO DAS access code. This allows the priority document registered in WIPO DAS to be requested by the Office for immediate download.</p> <p>Priority may be claimed either when filing the Community design application or within 1 month of the filing date. During this month, the applicant must submit the declaration of priority and indicate the file number as well as the date on which and the country in which the previous application was made (Article 8(2) CDIR), as well as the WIPO DAS access code in order for the</p>	The applicant is to enter the name of a country or region, application number and access code in the column of [Priority Claim under the Paris Convention, etc.] on the application form at the time of filing. Or, if adding an entry to the column later, the applicant is to submit online or in paper form within 3 months from the filing date, a written amendment making corrections in that column.	KIPO requires the office code, the application number, the filing date, and the DAS access code of the earlier application.	For foreign applications filed in a participating foreign IP office to which priority is properly claimed in a U.S. application and the corresponding WIPO DAS access code is provided, retrieval will be automatically attempted by the USPTO via the WIPO DAS Exchange when the U.S. application is released from the Office of Patent Application Processing. To properly claim foreign priority, the timely submission of an ADS form identifying the foreign application by application number, country where the application was filed, and foreign filing date in the “Foreign Priority Information” section of the ADS is generally required. The Foreign Priority Information section of the ADS form also includes an Access Code field for providing the required WIPO DAS access code.

	CNIPA	EUIPO	JPO	KIPO	USPTO
		EUIPO to retrieve the priority documents.			For design applications, the claim for foreign priority must be made during the pendency of the application.
II.2 – What is the timing of retrieval and part of your Office initiating retrieval (e.g., application processing or formalities department independent of substantive prosecution, examiner during substantive prosecution, etc.)?	The retrieval is at the request of applicant. After receiving the request from the applicant, CNIPA will review the request. If the review is approved, CNIPA will send the request to WIPO within one day.	<p>For each of the priorities that include a WIPO access code, EUIPO back-office tool requests the associated priority document to the WIPO DAS processor.</p> <p>If the response from WIPO DAS includes the requested document, it is stored in the back-office file.</p> <p>If the response from WIPO DAS is a business error, the EUIPO examiner will request the priority documents manually from WIPO DAS and await retrieval. In the event of a further error, the applicant will be invited to submit the priority documents within a period of three months of the priority claim.</p> <p>EUIPO examines fast-track applications within 2 working days, and standard track applications within 10</p>	<p>If the required entry such as access code etc. is made on the application form, priority documents will be retrieved automatically.</p> <p>If the documents cannot be retrieved during the automation process*, the formalities department will handle the case individually.</p> <p>*If priority documents are not submitted within 3 months from the filing date, the applicant will be notified to that effect pursuant to (1) below. The applicant can submit the priority document within 2 months from the dispatch date of this notification pursuant to (2) below. If the entry required for the document exchange via WIPO DAS is added to the application form by submitting a written amendment within the period specified in (2)</p>	KIPO requests a priority document of the application automatically as soon as an application is filed. The Industrial Property Application Division is responsible for initiating retrieval.	<p>For foreign applications filed in a participating foreign IP office to which priority is properly claimed in a U.S. application and the corresponding WIPO DAS access code is provided, retrieval will be automatically attempted by the USPTO via the WIPO DAS Exchange when the U.S. application is released from the Office of Patent Application Processing.</p> <p>It may take about 2 weeks to complete the process of sending the retrieval attempt to the foreign IP office and loading the electronically retrieved priority document into the application.</p>

	CNIPA	EUIPO	JPO	KIPO	USPTO
		working days. The first action is notified within 10 working days. As such, we have raised our expectations that the WIPO-DAS transaction time or turn-around time is urgently reviewed with the intention of improving the timeliness from one of hours to minutes or even seconds.	below, the priority documents will be retrieved automatically after formalities checks are completed. (1) Notification provision when priority documents were not submitted. (Article 43, paragraph (6) of the Patent Act) (2) Submission of priority documents after the above notification (Article 43, paragraph (7) of the Patent Act)		
II.3 – Do you require a specific type of document to be retrieved (e.g. the application form, or the registration certificate, or both?)	If only an applicant submits the priority document Digital Access Service (DAS) request, CNIPA will retrieve data from WIPO according to the request content.	No. The EUIPO accepts either the application form or the registration certificate.	No. We only receive documents provided via WIPO DAS.	KIPO does not require any additional documents besides an application form. Users can submit the office code, the application number, the filing date, and the DAS access code of the earlier application through our application form.	The USPTO requires a copy of the as-filed foreign application. In a design application, a claim for foreign priority and a certified copy of the foreign application must be filed within the pendency of the design application. The registration certificate is not accepted.
II.4 – Does your office provide confirmation of correct retrieval of priority document other than via the notification to the customer via the WIPO DAS applicant portal workbench? If yes, how	When WIPO informs CNIPA of the results, CNIPA will automatically send an email to the applicant.	Applicants receive an examination report containing the indication that priority has been successfully claimed. If the priority documents have not been retrievable from WIPO	No. *The applicant etc. can request to view the relevant priority documents for confirmation.	Users can confirm whether priority documents are retrieved correctly through Patent-Ro (https://www.patent.go.kr) which is KIPO's e-filing system. If KIPO	After a successful retrieval, the priority document is viewable in Patent Center and Private Patent Application Information Retrieval (PAIR). In addition, the examiner's

	CNIPA	EUIPO	JPO	KIPO	USPTO
(e.g., viewable to the applicant in the electronic file held by the Accessing Office and/or notice to applicant of failure)?		DAS, the applicant will be invited to submit the priority documents within a period of three months of the priority claim.		fails to retrieve a priority document, the Industrial Property Application Division issues a notice to the applicant of failure.	Office action should indicate whether the claim for priority is acknowledged and the priority document is present. The USPTO may also notify the applicant of a deficiency with respect to the retrieved priority document if one is subsequently discovered, despite a previous acknowledgement of receipt. The applicant is responsible for correcting any deficiency.
II.5 – What happens if retrieval fails (i.e., no priority document retrieved)?	CNIPA will repeatedly attempt to retrieve documents from WIPO, up to five times, within three months.	If the response from WIPO DAS is a business error, the EUIPO examiner will request the priority documents manually from WIPO DAS and await retrieval. In the event of a further error, the applicant will be invited to submit the priority documents within a period of three months of the priority claim.	If the documents cannot be retrieved during the automation process, the relevant department will handle the case individually.	If KIPO fails to retrieve a priority document due to incorrect information provided by the applicant (such as the application number, filing date, or DAS access code), KIPO issues a notice to the applicant requesting that they amend their application form. If KIPO fails to retrieve a priority document for other reasons, KIPO resends the priority document request to WIPO DAS. For patents, a written	Where the priority application is not present in the application file, the examiner should indicate this in the examiner's Office action. In addition, the applicant may view the contents of the application file via Patent Center or Private PAIR and find that the priority document was not retrieved even though the filing receipt indicates that the USPTO will attempt retrieval. After verifying

	CNIPA	EUIPO	JPO	KIPO	USPTO
				<p>notice requesting the submission of the priority document is sent to the applicant two months before the submission deadline. The applicant is also notified of the need to submit the priority document by phone one month before the deadline.</p> <p>For designs, a written notice requesting the submission of the priority document is sent to the applicant if KIPO has been unable to obtain the priority document within one month of the filing date. The applicant is notified of the need to submit the priority document by phone if KIPO has been unable to obtain the priority document within two months of the filing date.</p>	that the information on the filing receipt is correct, the applicant may contact the Electronic Business Center if the applicant has questions about the retrieval failure.
<p>II.6 – What happens if retrieval is incorrect (i.e., the proper priority document is not retrieved) or inconsistent (e.g. there is a discrepancy in the data indicated in the cover</p>	<p>If the retrieval is incorrect, it affects whether the priority is established. According to the Announcement on Issues Related to Digital Access Service for Opening Priority Documents (No.169),</p>	<p>At the examination stage, the Office will only examine whether all formal requirements are met.</p> <p>The formal requirements are:</p>	<p>(1) If the retrieved document has inconsistencies, the JPO will handle the case individually.</p> <p>(2) Retrieval failure may be due to incorrect entries by applicant or some</p>	<p>Inspecting priority documents manually → Resending the priority document request to WIPO DAS → Sending an email inquiry to the first filing office → Obtaining the paper priority document</p>	<p>In the event of incorrect, inconsistent or failed retrieval of priority documents, the applicant should verify the priority claim indicated on the filing receipt. If the first Office action is mailed, it</p>

	CNIPA	EUIPO	JPO	KIPO	USPTO
page and the priority document)?	<p>under the circumstance that the CNIPA fails to obtain the priority documents within the time limit specified in Article 30 of the Chinese Patent Law, if the applicant has evidence to show that all necessary steps have been gone through, and the delay of the time limit is caused by the failure of the electronic system of the priority document digital access service, the applicant could submit a copy of the previous application document within 2 months from the date of receiving the relevant notice.</p>	<ul style="list-style-type: none"> priority claim must be filed together with the Community design application or within 1 month of the filing date (Article 8(2) CDIR); file number, filing date and country of previous application must be indicated when claiming priority (Article 1(1)(f) CDIR); priority documents must be submitted by providing the WIPO DAS access code at the time of filing via e-filing or within 3 months of either the filing date or, as the case may be, receipt of the priority claim <p>A priority claim in respect of the contested RCD will be examined ex officio by the Invalidity Division during invalidity proceedings when the outcome of the invalidity case depends on whether priority was validly claimed.</p> <p>The requirements that refer to the substance of the priority claims are:</p>	<p>errors occurred on the Depositing Office side.</p> <p>(2-1) For incorrect entries by applicant, insufficient entries made on the application form is a cause, so the applicant will be held responsible. It is now possible to submit priority documents within 2 months from the dispatch date of legal notice that priority documents were not submitted within the designated period (within 3 months). Accordingly, the priority claim will remain effective as long as the application is amended properly within that period.</p> <p>(2-2) For retrieval failure due to some errors occurred on the Depositing Office side, the JPO will handle the case individually.</p>	<p>directly from the applicant → Requesting an amendment to the application form → Denying the priority claim during the substantive examination</p>	<p>should indicate the completeness of the priority claim.</p> <p>If the filing receipt reflects the accurate foreign priority claim and that the WIPO DAS access code has been provided, the applicant should contact the Patents Electronic Business Center and request that the matter be escalated to determine why the priority document is not yet in the file. If an incorrect priority document was retrieved from the depositing office or the data is inconsistent, applicant should reach out to such office to ensure that the correct/consistent priority document is deposited and/or obtain a certified copy from that office in paper form.</p> <p>The applicant bears the ultimate responsibility for ensuring, within the time period set forth in 37 CFR 1.55(g)(1), that a copy of the foreign application is received</p>

	CNIPA	EUIPO	JPO	KIPO	USPTO
		<ul style="list-style-type: none"> • previous application must be a first filing; • previous application must concern a design or a utility model; • Community design must relate to the 'same design or utility model'; • proprietor must be the same; • priority must be claimed within 6 months of filing the first application; • previous application must have been filed in a country where a right of priority can arise. <p>If the priority claim does not satisfy all of the substantive requirements, the holder concerned will be invited to make observations within the time limit set by the Office. If the validity of the priority claim cannot be verified, the priority cannot be taken into account for the purpose of the proceedings concerned. The decision on the priority claim can only be appealed together with</p>			<p>by the USPTO from the participating foreign intellectual property office, or that a certified copy of the foreign priority application is filed. That is, if retrieval fails, or an incorrect priority document is retrieved, the applicant remains responsible for the submission of the correct certified copy of the foreign application.</p> <p>In a design application, the claim for priority and the certified copy of the foreign application must be filed within the pendency of the application, unless filed with a petition accompanied by the fee set forth in 37 CFR 1.17(g) which includes a showing of good and sufficient cause for the delay in filing the certified copy of the foreign application. If the claim for priority or the certified copy of the foreign application is filed after the date the issue fee is paid, the patent will not include the priority claim unless corrected by a certificate of correction</p>

	CNIPA	EUIPO	JPO	KIPO	USPTO
		<p>the final decision on the invalidity proceedings.</p> <p>Therefore, for priority documents submitted via WIPO-DAS, once the Office has retrieved a document based on the information from the applicant the priority is considered as claimed. We do not examine the priority certificate prior to registration of the design. This process is actually automated.</p> <p>Only where needed in invalidity proceedings would the Office examine the substantive requirements of the priority claim, and in such cases, in the event of a discrepancy in the cover page and the priority document, invalidity examiners would rely on the information contained in the priority documents. In the event of doubt, the Office would invite the Community design holder to clarify/remedy</p>			under 35 U.S.C. 255 and 37 CFR 1.323.
II.7 – What is the responsibility of applicant if retrieval fails or is incorrect?	If retrieval fails or is incorrect, the applicant is requested to submit a copy of the previous	The applicant is not responsible for the correct functioning of the EUIPO and WIPO	The applicant is responsible for retrieval failure due to insufficient entries made on the	It is the responsibility of the applicant to provide accurate information regarding the	If the electronic copy of the priority document is not contained in the application despite
